Scope, units and assumptions

Counts are physical drawn parts, not workstation capacity, procurement quantities or simulation resource capacity.

W × D × H: stored local dimensions in mm, before rotation. Polygons and solids need separate fabrication details. Display precision: 0.001 mm; original geometry stays in the project.

P references identify groups with the same name, kind, dimensions and shape. Repeated references are shown once per zone; small or structural parts may have no label on the plan; every part ID is listed here.

Dimensions are model dimensions, not a site survey. Areas follow drawn outlines, less floor holes; overlapping zones are counted once only in the zoned total.
