

Alder & Pine / Retail renovation

Baseline A: twelve gondolas before the proposed renovation.

Measure	A	B
Merchandise gondolas	12	Pending
Gondolas per floor	6	Pending
Chosen main / cross aisle	1.80 m	Pending
Minimum gap between gondolas	4.00 m	Pending
Entry to 2F rear checkpoint	30.33 m	Pending
Existing stair flight width	1.20 m	Pending
Drawn floor area, less opening	494.64 m²	Pending
Shelves reached: circle r=0.55 m	12/12	Pending
Retained non-aisle gap findings	4	Pending

Drawing inset: use written dimensions; the original sheet scale does not apply.

A is the retained editable baseline. Main/cross-aisles are 1.8 m, west perimeter aisle 1.2 m, existing U stairs 1.2 m wide. The matching upper-floor opening is explicitly modeled. The 1.4 m shelf-aisle zones reserve space for B; actual A shelf gaps are 4.0 m.

Quantity and reach checks only. Text-table values are transcribed from the saved MCP JSON and geometry checks, not simulation metric cells. Four narrow slots behind the stair enclosure remain visible findings. No sales, queue, evacuation, legal or wheelchair-turning claim. Studio and PDF acceptance pending.

2F / home and gifts
