

Alder & Pine / Retail renovation

Proposal B: eight additional gondolas, with the chosen aisles retained.

Measure	A	B
Merchandise gondolas	12	20
Gondolas per floor	6	10
Chosen main / cross aisle	1.80 m	1.80 m
Minimum gap between gondolas	4.00 m	1.40 m
Entry to 2F rear checkpoint	30.33 m	30.69 m
Existing stair flight width	1.20 m	1.20 m
Drawn floor area, less opening	494.64 m ²	494.64 m ²
Shelves reached: circle r=0.55 m	12/12	20/20
Retained non-aisle gap findings	4	4

1F / everyday goods

Drawing inset: use written dimensions; the original sheet scale does not apply.

B adds four shelves per floor (+66.7%). Both circular profiles reach all shelves and service rooms. The four matched routes change by 0–0.42 m. Checkouts move forward; stock fixtures move inside fixed rooms. West perimeter aisle: 1.2 m.

Quantity and reach checks only. Text-table values are transcribed from the saved MCP JSON and geometry checks, not simulation metric cells. Four narrow slots behind the stair enclosure remain visible findings. No sales, queue, evacuation, legal or wheelchair-turning claim. Studio and PDF acceptance pending.

2F / home and gifts
